## VIRTUAL VEHICLE

VIRTUAL VEHICLE is an internationally successful research and development center for virtual vehicle technologies. We deal with future vehicle concepts and future development processes. Current developments in the field of powertrains and driver assistance systems are leading to strongly software-based vehicles (software-defined car) and therefore require a rethink and new approaches in vehicle development. With over 300 employees, we are the largest research center for virtual vehicle development in Europe. We are working on safe, environmentally friendly and affordable vehicles of the future.

The objective of this role is to operate and develop the existing IT services to provide the best IT experience for our researchers.

We are **currently** looking for a

# System Administrator (f/m/d)

## Your Tasks

- Configuration, operation, maintenance and further development of the assigned IT services.
