APPLY NOW

SETLabs

SETLabs Research is a Munich-based research center founded in 2021 as a subsidiary of Virtual Vehicle Research GmbH in Graz, Austria.

SETLabs partners with academia and industry for joint projects to enable knowledge transfer from basic and applied research into real-world applications. The center has domain-open expertise in modeling and simulation, hardware/software integration, systems engineering, machine learning, and artificial intelligence. The main research fields are healthcare technologies and mobility.

Initiative Application

Your Tasks

Your contribution to the promotion of sustainable development, production and operation of technical systems using trustworthy digital technologies.

Your Profile

We are looking for innovative thinkers, creative minds and motivated people who enjoy project-based work and want to dive deep into the wave of digital transformation and create benefits that make the world a better place than before.

What's in it for you

- Interesting international projects with a solid partner network.
- Collaboration and contributions in an engaged, dynamic team.
- Flexible working hours and the possibility to work remote.
- Mini job employment possible.
- Paid Master's Thesis.
- Corporate events.
