Initiative Application

VIRTUAL VEHICLE is an internationally successful research and development center for virtual vehicle technologies. We deal with future vehicle concepts and future development processes. Current developments in the field of powertrains and driver assistance systems are leading to strongly software-based vehicles (software-defined car) and therefore require a rethink and new approaches in vehicle development. With over 300 employees, we are the largest research center for virtual vehicle development in Europe. We are working on safe, environmentally friendly and affordable vehicles of the future.

Your Tasks

Contribute to the development of safe, environmentally friendly and affordable vehicles of the future.

Your Profile

We are looking for **innovative thinkers, creative minds and motivated people**, who enjoy project-based work and want to be part of an international team in an interesting, dynamic and fast changing automotive and rail environment.

What's in it for you

- Possibility for a dissertation with permanent contract.
- A highly varied and diverse range of tasks in an international research centre.
- An exciting and interdisciplinary working environment with a lot of creative freedom.
- Possibility of home office and individual time management that offer you the flexibility you need.
- An environment with flat hierarchies that gives you the freedom to take on responsibility and allows for creative collaboration.
- Personal and professional development opportunities on any career level.
- Welcome Day for new employees'.
- Mentoring programme for new employees'.
- Sports and health promotion activities, including weekly yoga, company runs etc.
- Corporate events.
